

# Neve

## Efficient bone grafting

Spineway offers bone substitutes in order to improve bone regrowth during arthrodesis.

Neve is a gel of pure nano particles of hydroxyapatite in aqueous solution. 100% synthetic.

Presented in a syringe, for easy local application :

- 1ml
- 5 ml

- Consistency is pasta, no polymerisation phase
- Favors osteogenesis cycles activation
- Resorption start to 3 months after implantation
- 100% synthétique origin (no animal substance)
